

SPINNER BT

Bluetooth Turntable

Hear an instant connection to your record collection

Hear an instant connection to your record collection using Bluetooth to pair quickly to your portable speakers, soundbar or headphones for vinyl playback wirelessly. Using aptX™ HD encoding, there is no sonic compromise. The sound from your records is as good as with wires. The JBL Spinner BT includes analog outputs for existing Hi-Fi systems, with a phono pre-amp built in for use with active speakers. Using an aluminum platter and tonearm, the JBL Spinner BT is testimony to the joy of music and vinyl records. Records are played in perfect time at 33 $\frac{1}{3}$ rpm for LPs and 45 rpm for EPs and singles. Speeds are locked with a speed sensor for perfect pitch. The tonearm features a high-quality moving magnet cartridge pre-installed on a removable head shell for easy replacement and upgrade. The feet are damped to reduce unwanted vibration masking your music. This all gives you the best sound from your records, without wearing them out.

Features

- ▶ Bluetooth with AptX-HD™
- ▶ Vibrant Design
- ▶ High-Quality Components
- ▶ Removable Headshell
- ▶ Aluminum Platter and Belt Drive
- ▶ High-quality moving magnet cartridge pre-installed

SPINNER BT

Bluetooth Turntable

Features and Benefits

Bluetooth with AptX-HD™

Quickly pairs to your Bluetooth speakers or headphones for an instant connection to your record collection. Using AptX-HD encoding, there is no sonic compromise.

Vibrant Design

Your personal statement of the warmth and joy that Vinyl brings to your life, a more intimate relationship with your favorite music artists.

High-Quality Components

Hear the quality of records without destroying them in the process. The high quality Aluminum tonearm ensures excellent tracking of the record groove, without wearing it out.

Removable Headshell

The end of the tonearm, where the cartridge is fitted, is called the headshell. It is removable making it easy to replace and upgrade the cartridge

Aluminum Platter and Belt Drive

The Aluminum platter is driven by a belt drive and motor with an optical sensor underneath to ensure your records are played perfectly in time at 33 $\frac{1}{3}$ rpm for albums, or 45 rpm for EPs and singles.

High-quality moving magnet cartridge pre-installed

Use the JBL Spinner BT straight from the box with a high-quality moving magnet cartridge already installed and aligned.
