

SAP Access Management: Streamlined in Just 4 Weeks

A Success Story by Orior AG, E&P Consulting, and Conteliga

When **Orior AG**, a leading food manufacturer, decided to replace its outdated and costly SIVIS access management solution, the objective was clear: **reduce costs, streamline complexity, and regain control over SAP identity and access management**. Partnering with **E&P Consulting** and **Conteliga**, Orior AG successfully transitioned to a fully integrated, SAP-native IAM platform — all within **just four weeks**.

The Challenge

E&P Consulting implemented Conteliga, fully aligned with Orior's goals:

- *Eliminate high licensing and support costs*
- *Centralize user and role management across multiple SAP systems ERP & HANA*
- *Ensure full HR integration / Identity Management for user lifecycle management*
- *Become independent from vendor-locked role development*

The Solution

- ✓ **Role Manager**
Intuitive, independent role design
- ✓ **Firefighter & Role on Demand**
Rule-based emergency access, reduced audit load
- ✓ **Identity Management**
Automated user lifecycle across ERP & HANA
- ✓ **HR Integration**
Real-time provisioning for joiners, leavers, movers

Steps to Success with E&P SAP Health Check

In just **4 weeks**, Orior AG went live — fully productive from day one:

- **25% lower costs** for licenses and AMS service
- **Automated user provisioning** and **user lifecycle management** across all SAP systems
- **Lean, secure, and compliant integration into SAP system landscape** (via RFC and transport management)
- **Full internal management** no vendor dependency

*"We achieved significant cost savings, streamlined our SAP processes, and gained full control from day one — all through a centralized platform. **That's an unbeatable performance.**"*

— Jochen Dinkel, Orior AG
