

Webinar

“Mental Health in Science”

Young Scientists Forum
German Society for Biomaterials (DGBM)

Date 13-12-2022

Time:

3:00–4:00 p.m. CET

**03:00 p.m. Welcome and introduction
of the YSF**

**03:10 p.m. Presentation by Hendrik
Huthoff**

Dr. Hendrik Huthoff is the Head of Education at the Jena School from Microbial Communication where he is responsible for the training program of doctoral and post-doctoral researchers. During his chemistry

studies and his PhD research at the University of Amsterdam, he developed a severe anxiety disorder that had a major impact on his life despite finding ways of successfully completing his scientific work. When he became a research group leader at King's College London, he also had to deal with instances of mental health problems of students. In 2020, he set up the first Mental Health First Aid team at a German University and during his talk he will share personal as well as organisational experiences that address topics such as toxic working environments and creating a supportive culture of work-place wellbeing.

03:40 p.m. Open panel discussion
