# SNORKEL – EN

## INSTRUCTIONS FOR THE CORRECT USE AND CARE

Read the instructions carefully to understand the function and handling of the products. For your own safety and more fun in the water.

EN1972-2015

The snorkel is used by the swimmer to breath when surfacing, while having the face submerged. The size of snorkel is related to the user's lung capacity. The snorkels marked with "EN1972-2015 B" are to be used by persons with small lung capacities (volume<150ml and Length <350mm) and below 150 cm tall (4 FT 11inch). The snorkels marked with "EN1972-2015 A" are to be used by persons with large lung capacity (volume>150ml and Length between 350mm-380mm) and over 150 cm tall.

**WARNING!** It is dangerous to extend the length of the snorkel. Pay attention that there are no foreign objects added into the snorkel or the mouthpiece - this can cause potential danger to life! Size A snorkels shall not be used by persons with small lung capacity and smaller than 150cm, to avoid a high CO<sub>2</sub> concentration level. The use of this product by children has to be always under the direct control of adults. Use the snorkel only in water. If you discover any damage at the snorkel, don't use it.

**INSTRUCTIONS FOR USE:** Fix the snorkel holder to the mask strap on the left side of your face. Then put the mask on your face. Shift the snorkel to the right position using the snorkel holder. To get water out of the snorkel and mouthpiece, blow strongly into the mouthpiece to empty the snorkel tube. When snorkeling, breath smoothly and pay attention, so there is no water entering the tube and your respiratory tract.

**SAFETY TIPS:** Before entering the water make sure the tube is correctly set into the mouthpiece and the snorkel is firmly attached to the mask strap by the snorkel holder. Safety colored plastic terminals on top of the tube make the swimmer more visible when surfacing and should be immediately replaced if lost, by an original **DYNAMICNORD** terminal.

**CARE AND MAINTENANCE:** To obtain the maximum life from any of these articles: Avoid unnecessary exposure to sunlight and air. Avoid contact with oils and greases. Some sun creams and lotions are of an oily composition. Avoid exposure to heat and contact with hot surfaces over 60°C. Store in a cool, dry place in a box or bag and in the dark, and do not distort during storage. Damaged parts must immediately be replaced using original spare parts.
