

EcoWash

Degreaser & Solvent Replacement
The Ultimate Chemical-Free Cleaner
Dissolves Oils & Biohazards

EcoWash is the future of industrial cleaning, an eco-friendly, chemical-free, non-ionic surfactant designed to replace toxic cleaners. This 100% organic solution dissolves oil, grease, and biohazards, making it ideal for industries requiring powerful yet safe cleaning solutions.

Unlike traditional cleaners, EcoWash works with nature by breaking down contaminants at the molecular level into harmless elements like nitrates, carbon dioxide, and water. It's safe for wildlife, marine life, and the environment, ensuring a cleaner planet without the risks of harmful chemicals.

Key Benefits:

- Non-toxic and carcinogen-free
- Safe for use around wildlife and marine life
- Biodegradable, eco-friendly solution for tough industrial cleaning
- Works with nature to safely break down contaminants
- Safe for skin and the environment - No PPE Required

Storage & Shelf Life

- Usable for 3 years or longer under stable temperature conditions.
- Can be stored in sunlight; operating temperatures range from

EcoWash ensures a cleaner planet without the risks of harmful chemicals

Application Guidelines

General Cleaning & Degreasing

Always remove excess dirt, grease, or contaminants.

Application: By Hand

- a. Apply EcoWash and wait a few minutes for it to break down contaminants.
- b. Rinse with clean water or wipe with a clean cloth for smaller objects.
- c. For heavy buildup, allow longer sitting time or repeat application.

Application: Pressure Washer

- a. For excessive thick buildup spots, apply EcoWash by hand pump and wait 5 minutes.
- b. Set the manifold or wand to mix EcoWash concentrate at 4:1.
- c. Pressure wash per standard procedures.

Pre-Treatment for Oil or Hazardous Chemical Spills, Frac or Settling Ponds, Well Site Cleanup and Sewage Spills or Lagoons

- Spray affected areas liberally with EcoWash to break down oil or contaminants.
- May apply by hand pump, pressure washer, fire nozzle or aerial methods.
- Wait 12-24 hours if possible for maximum results (initial effects are immediate).
- Follow with BioTec™ or GroundSaver as applicable for complete remediation.

EcoWash is Water Activated, amplifying its cleaning power upon contact

Industries We Serve

- **Oil & Gas:** Rig wash, casing, tubular cleaning, and camp/building maintenance.
- **Environmental Cleanup:** Pre-treatment for oil or hazardous waste spills, pipeline leaks, well site, frac or settling ponds or sewage spills.
- **Heavy-Duty Pressure Washing:** Removes oil, grease, tar, mildew, mold, and stains from vehicles, boats, marinas, parking areas and buildings.
- **Commercial & Institutional:** Cleans deep fryers, grills, floors, bathrooms, and sanitation equipment.
- **General Degreasing:** Cleans tools, engines, pumps, heavy equipment, drilling rigs and processing equipment.
- **Disaster & Emergency Response:** Cleans and disinfects bacteria, mold, and sewage spills in public areas, buildings, and roads.
