

## MOBILE LIVING

With the Housing-series **EcoRelax** we present a modern and exclusive variant of mobile housing. With a surface of ca. 20-40sqm and a high-quality interior design we offer you a fully luxurious apartment. The living room is flooded with light thanks to great window fronts, a full-fledged kitchen and non-compromised bathroom leave no wishes open.

A very special place takes our core piece that consists of a mobile wardrobe that allows to arrange the interior according to the time of the day and your mood.

The basic model of **EcoRelax** can be expanded thanks to our additional modules. In that way you may access the SkyLounge through a spiral staircase that allows for a roof-terrace. Additionally, you may choose a terrace for the entrance, too.

*Combination of 3 modules:  
Living, SkyLounge, Terrace*

The technical area is as well based on modules, so that it can grow at any time and without much effort according to individual expectations and current technical development.

The **EcoRelax** offers variable set-up options. It can be positioned on a property in a mobile way on wheels or it can be fixed on a strip foundation. On wish we can make it possible for you to use it on water.

### TECHNICAL EQUIPMENT

The technical area is modular too. Depending on the needs and the level of technical development it can be expanded at any time without much effort.

- Water treatment (water and sewage)
- Alternative energy supply (propan-butan, pellets, diesel, petrol)
- Self-sufficient energy supply (storage, solar-power, wind-power, air heat pump)

### BASIC VERSION

- Sandwich-structure, steel/wood-frame (nesting as option)
- Mobile unit on a strip foundation (or on wheels)
- Electricity: wall-mounted luminaries, USB-switches and sockets
- LED luminaries on the façade and on the ceiling
- Modular technical equipment room
- Exterior power, water and sewage connector
- Windows: double glazing (optional aluminium frames)
- Floor living area: laminate
- Floor bathroom: Vinyl (optional stone carpet)
- Bathroom equipment: Villeroy&Boch, Grohe or qualitatively matching
- Shower&Toilet

### TECHNICAL EQUIPMENT
