Speckled Walnut

Exclusive DSI Powder Coating Process

DSI's proprietary 10 step powder coating process provides an uncompromising quality created by state-of-the-art technology. Our system is certified by the Powder Coating Institute providing peace of mind in your investment. Our powder coating is verified by the American Architectural Manufacturers Association and is covered by a Lifetime Limited Warranty.

1 The raw premium-grade aluminum is **inspected** to be free of blemishes and is not exposed to the outdoor elements.

2 The product enters a **heated cleaning stage** to remove extrusion debris and fabrication oils.

3-6 **Clean:** City water rinse
Cleaner: Recycling reverse osmosis water rinse
Cleanest: Pure reverse osmosis water rinse
Sealer: Dried-in-place aluminum sealer

7-8 A 200 MPH air blast **removes water drops** from the pre-treated aluminum. A **convection oven** completes the dry-off process.

9 Powder is **applied** with 18 automated and 2 manual spray guns. Compressed process air is dried to -35°F Dew Point for superior adhesion.

10 The powder coating is **then bonded** and adhered to the aluminum substrate in a 400 degree cure stage.

CARDINAL VINYL RAILING

Cardinal Vinyl Railing
