# DYNAMIC SOLUTIONS INNOVATION

Since 1984, Digger Specialties, Inc. (DSI) has manufactured quality products for the outdoor living industry.

DSI is constantly improving and innovating to bring better products to the marketplace.

Composite and Fiberglass Columns are available in three different finishes to meet your installation and design needs.

- **Mill Finish** - This standard column comes ready for finishing and painting.
- **Caulk-N-Walk** - This column is ready to install, just caulk and walk away.
- **Pre-Finished Architectural Coated** - This column provides both beauty and durability and saves installation time.

All Composite and Fiberglass Column products feature heavy duty packaging to resist transit and jobsite damage and are backed by a Lifetime Limited Warranty. DSI offers the first Pre-Finished Architectural Coated Column Warranty in the industry.

DSI Columns® offer quality craftsmanship, impeccable design, and integrated architectural elements to deliver an elegant and low-maintenance, long lasting column.

Composite and Fiberglass Columns are available in a broad selection of sizes, models, and load-bearing capacities to meet most project applications.

# COLUMN TYPES

## COMPOSITE

DSI manufactures all of our composite columns, capitals, and bases at our North Carolina facility. These columns are made using calcium carbonate (marble dust), polyester resin and other ingredients for optimum beauty, realism, and resilience. Engineered for lasting durability and structural integrity, our products will stand up to the harshest elements and continue to add beauty and elegance for years to come.

### **Key Features:**

- A broad selection of models and sizes
- Perfect for both interior and exterior installations
- Uses the best raw materials and state-of-the-art equipment available
- A consistent smooth finish that requires minimal sanding
- Load bearing, durable, and low maintenance

## FIBERGLASS

Our lightweight fiberglass Herculite Columns are made using an advanced pultruded technology. Herculite Square Smooth Columns provide a strong and lightweight option for your column needs.

### **Key Features:**

- Price comparable to site built
- 1 hour installation versus 3 hours site built installation
- Load bearing, lightweight, and easy to install
- Patented Snug-Fit® Capitals
- Tough sidewalls providing impact resistance

# COLUMN FINISHES

## MILL FINISH

Mill is the standard finish for all DSI Composite and Fiberglass Columns. This finish allows you to choose your color and paint gloss level. These columns require prep (sanding, fill, and cleaning) prior to job site painting.

### Key Features:

- Allows customization of colors to match your style
- Industry standard for column finish

## CAULK-N-WALK®

Caulk-N-Walk Columns eliminate the need to prep and paint select sizes of our Round Smooth Tapered Columns. Columns are prepped and ready for installation or to be painted if you desire. Caulk-N-Walk Seamless Columns take column installation to the next level. No more parting lines to sand or fix with body putty.

### Key Features:

- The first white seamless column system. The color runs all the way through the column.
- Column produced with titanium dioxide (TiO<sub>2</sub>).
- No painting needed
- Round Tapered Columns
- Matching Caulk-N-Walk Capital and Base

## PRE-FINISHED ARCHITECTURAL COATED

Pre-Finished Architectural Coated Columns are created using an innovative state of the art coating process. This distinctive and exclusive ready to install column, including coated capital and base, eliminates the need for onsite prep and painting.

### Key Features:

- DSI Elite White factory sprayed finish
- Ready to install Pre-Finished Column
- Coated Finish Warranty (AAMA 2604)
- Saves installation time
- Available for all Composite and Fiberglass Columns

# COLUMN INSTALLATION

## PLUMB PERFECT®

### The First All-In-One Box Column Installation System

Digger Specialties, Inc. takes a common sense approach to removing the hassles associated with installing a column. The Plumb Perfect® Column Installation System will guide you through the installation process to project completion, while saving you valuable time and money.

#### Key Features:

- Eliminates outside installation hardware
- Eliminates finish work on screw heads by concealing all installation devices
- No more searching for parts
- Base target assists in positioning base ring and column

Available for **select** models and sizes. Please see individual model charts for availability.

Additional installation hardware available.  
See page 21 for more information.

Patent # US 8,424,259 B2 and Patent # US 8,713,873 B2

# COLUMN CUTS

## SPLIT-FIT®

Traditional split columns can be difficult to reassemble on-site and require multiple leveling and alignment adjustments to realign the two halves.

Our unique cast indexing keys make aligning the column halves a simple process, saving you valuable time — virtually eliminating the frustration of split column installation.

Patent # US 8,234,837 B2

### Key Features:

- Factory assembled aligning keys restrict lateral & vertical play
- Fully split columns arrive ready to install
- Precision diamond cut line is easy to finish
- Patented Tongue & Groove fit assures snug installation
- Optional Reassembly Kits available (See page 21 and ask your supplier for details)

## PILASTER

For those special projects that may need a unique pilaster column, DSI has the ability to meet your specifications.

### Pilaster Cuts

D = Split in 1/2 (two halves)

F = Split in 1/2 (two halves)

The graphic below shows the many custom cut types available for splitting your column. Custom Cuts are special order and customized to your needs (standard DSI lead times do not apply to special orders).

### Custom Cuts

G = Cut out for an inside corner

H = Cut out for an outside corner

K = Cut out for a wall wrap

L = Cut out for outside flush wall wrap

FIBERGLASS  
**SQUARE**  
COLUMNS

Fiberglass Pultruded Columns (Herculite) offer a lightweight alternative to composite (cast) columns. Square Smooth Herculite columns are designed with advanced technology to produce load bearing columns.

# SQUARE CAPITALS & BASES

Capitals and bases provide a finishing touch to your column. The standard capital and base set for square columns is the Tuscan-style.

DSI's Tuscan capitals for square columns are made from Polyurethane. Most sizes of our Tuscan capitals are made utilizing a patented process to create a **Snug-Fit** capital. The Polyurethane capital is created with a foam ring for a snug-fit. This capital eliminates the need to purchase a backer rod to close the gap that can occur between the column shaft and the capital. Snug-Fit capitals do not require pilot holes.

The Tuscan base is made from the same material as the column to protect both the base and column from dents and other damage. An optional Alto-style base is also available for square columns.

# ROUND CAPITALS

Our standard Tuscan Capitals are cast from the same rock hard composite material as our column shaft assuring maximum durability. Although casting capitals from this material requires extra attention to detail, we think you will agree it is worth the effort.

Most sizes of the Tuscan Tapered Capitals are made from Polyurethane. And some sizes are made utilizing a patented process to create a **Snug-Fit** Capital. The Polyurethane Capital is created with a foam ring for a snug-fit. This capital eliminates the need to purchase a backer rod to close the gap that can occur between the column shaft and the Capital. Snug-Fit capitals do not require pilot holes.

# ROUND DECORATIVE CAPITALS

Decorative Capitals provide an opportunity to augment architectural integrity and beauty to your home. DSI Decorative Capitals are load-bearing and made from the same material as the column. This ensures a great looking column that is easy to maintain.

To use Decorative Capitals with our Round Smooth Non-Tapered Columns, select one size larger capital than the column size. Example: A 10" Non-Tapered Column requires a 12" Roman Ionic Capital.

# TECHNICAL DATA AND PACKAGING

## Load-Bearing Specifications

Load-Bearing specifications are listed on the DSI Website, [dsicolumns.com](http://dsicolumns.com).

Load limits are specific to a product's diameter or profile and predicated on 100% coverage at the top and bottom of a column.

## Fire Rated Product

DSI has fire rated products available upon request. Our fire rated products have received Class A Certification through testing for flame spread and smoke developed standards set forth in the ASTM E84 Test.

## Packaging

Nothing increases the cost of a project more than delays. Delays can occur when the column arrives damaged, or the capital and base sets are separated from the order.

DSI takes great care in packaging our Columns. Most sizes are packaged with the complete shaft, capital, and base in one box. The column shaft is "cradled" in the box with foam rings to resist damage.

# INSTALLATION KITS AND HARDWARE

## Optional Bracket Kits

Optional bracket kits contain 6 round brackets or 4 square brackets and screws.

The Round and Square Bracket Kits assist in the prevention of column kick-out.

## Optional Split-Fit® Reassembly Kits

Optional Split-Fit® Reassembly kits include Adhesive Cartridge with Adapter and (1) Roll of 3M/Scotch Bonding Tape.

## Round Smooth Column Adapter Kits
