

Switch sustainability up a gear

At Lucy Group, we're on a mission to make the built environment more sustainable.

Our secondary power distribution equipment and know-how support the transition to renewable energy.

Our intelligent street lighting, electric vehicle charging infrastructure and IoT connectivity pave the way for smart cities that deliver operational efficiencies and energy savings.

And our HRC fuse products provide safety and protection, ensuring uninterrupted power.

With 200 years of engineering excellence, nobody is more switched on.
