SECURITY ADVISORY

Locked Jar

ABOUT US

Our company is dedicated to helping organizations improve their security processes and unlock the true value of their security programs. We understand that navigating the constantly changing landscape of security can be overwhelming and challenging, which is why we offer guidance and expertise to assist organizations in planning and executing their security projects.

Our approach is centered around the idea that small incremental changes can lead to significant progress. We work with our clients to identify areas for improvement and develop a plan to implement changes that are tailored to their specific needs. By focusing on making small but meaningful changes, we help organizations build a foundation for long-term success in today's rapidly evolving environment.

In addition, we recognize the importance of being "future ready" in the current business climate. We strive to help our clients stay ahead of the curve by providing expert guidance on the latest security controls and processes.

Building Strategies   **Optimizing Processes**   **Training your Workforce**

OUR GOAL

Our goal is to help you build a security culture from the ground up. We will guide you on how and where to start, the rest of the journey we will make sure to support you as you build your security culture rather than do it for you. Because we know that when something is parachuted into a company and employees do not have a stake in it. It usually fails. With our solutions, you can grow your business while keeping it secure.

Our offerings are built for not only your current company, but also when you scale it up! It is future-proof and will fit for small 5 person teams and 250. Give your teams and customers the peace of mind they want from your services and products. Check out our free resources or the store for templates that will help you get started today.

We were recently engaged by a global non-profit healthcare start-up ...

CHALLENGE ⌄

We were engaged by a global non-profit healthcare start-up to enhance their security measures and ensure compliance with industry regulations. Our team of experts began by conducting a comprehensive assessment of the organization's current security practices and processes. Through the use of questionnaires and discovery workshops, we were able to identify any gaps or vulnerabilities in their existing system

EXECUTION ⌄

1 With this information, our team of security architecture experts worked closely with the start-up to design a comprehensive security architecture that not only protected sensitive patient data but also adhered to industry regulations such as the General Data Protection Regulation (GDPR) and the California Consumer Privacy Act (CCPA). To ensure the security of their system, we also implemented threat modeling techniques to proactively identify and mitigate potential security threats, stimulating various attack scenarios, which identified vulnerabilities and recommend remediation measures to protect against them.

KEY SERVICE AREAS ⌄

THREAT
Modeling

RISK
Assessment

ADVISORY
Services

2 We provided compliance adherence consulting to ensure that the healthcare startup was fully compliant with GDPR and CCPA helping them to understand the requirements of these regulations and provided guidance on how to implement them effectively. This included creating policies, procedures, and processes that adhered to the regulations, as well as training staff to ensure they were aware of their responsibilities under the regulations.

3 We provided ongoing security advisory and general consulting services to help the healthcare startup navigate the ever-changing landscape of cybersecurity while helping them understand the various security risks and threats that they may face, and provided guidance on how to mitigate and manage these risks on an ongoing basis

4 Our engagement with the healthcare startup was a great success. Thanks to our efforts, they were able to secure their sensitive patient data, comply with industry regulations, and proactively mitigate potential security threats. The healthcare startup continues to work with us on a regular basis to ensure their continued security and success
