INSURANCE DEVSECOPS PROGRAM IMPROVEMENT

Locked Jar

ABOUT US ⌄

Our company is dedicated to helping organizations improve their security processes and unlock the true value of their security programs. We understand that navigating the constantly changing landscape of security can be overwhelming and challenging, which is why we offer guidance and expertise to assist organizations in planning and executing their security projects.

Our approach is centered around the idea that small incremental changes can lead to significant progress. We work with our clients to identify areas for improvement and develop a plan to implement changes that are tailored to their specific needs. By focusing on making small but meaningful changes, we help organizations build a foundation for long-term success in today's rapidly evolving environment. In addition, we recognize the importance of being "future ready" in the current business climate. We strive to help our clients stay ahead of the curve by providing expert guidance on the latest security controls and processes.

OUR GOAL ⌄

Our goal is to ensure that our clients are prepared for any potential threats and can protect their assets and data effectively. We understand the importance of having a robust and reliable security program, that's why we work closely with our clients to develop a comprehensive security plan that addresses current and future risks. Our team of experts is dedicated to staying up-to-date with the latest security trends and technologies, so we can provide our clients with the most current and effective solutions.

We strive to empower our clients with the knowledge and tools they need to build a strong and resilient security program. We work with organizations of all sizes and industries, and we tailor our services to meet the unique needs of each client. Our ultimate goal is to help our clients achieve peace of mind and a sense of security, knowing that they have the means to protect their assets, data, and reputation.

AT A GLANCE ⌄

Our threat modeling, risk assessment and advisory services helped our client in the insurance space improve their security posture and reduce risk. We are proud to have played a role in helping them better protect their customers' sensitive information

We were recently engaged by a leading company in the insurance space ...

CHALLENGE

At Locked Jar, we understand the importance of security in the insurance industry. With sensitive customer information and financial data at risk, it is crucial for companies in this space to have a strong security posture. That's why we were excited to work with one of our clients, a leading insurance company, to evaluate their software development practices and identify any gaps in their security workflows.

EVALUATION

To begin, we utilized a combination of questionnaires and discovery workshops to gather information about the company's current security practices. This allowed us to gain a comprehensive understanding of their existing processes and identify any areas where they could improve.

EXECUTION

1 We first performed a thorough threat modeling and risk assessment to determine the company's overall security posture. This process helped us identify potential vulnerabilities and areas of risk within the company's software development lifecycle

2 Based on our findings, we provided a comprehensive advisory report outlining our recommendations for how the company could improve their security posture. These recommendations included best practices for secure software development, as well as specific steps the company could take to address identified vulnerabilities

3 With our guidance, the company was able to strengthen their security posture and reduce their overall risk. By implementing our recommendations, they were able to improve their software development practices and ensure the protection of their sensitive customer information
